

DISABLING OPTION FOR PC TURNING ON VIA INCOMING PHONE CALLS

1. Turn on your PC
2. As the PC is turning on, press the “del” key. It should mention on the screen “Prepare to Enter Setup” or alike
3. A blue screen should appear with yellow writing
4. You need to use the direction keys and go down to “Power Management” & press enter
5. Go down to “ModemRingOn/WakeonLAN” and press “Enter” then change to “Disabled”
6. Press “Esc” on the keyboard to get you back to the main menu
7. Move over to “Save & Exit Setup” on the menu and press “Enter”
8. Make sure that there is “Y” in the answer, then press “Enter”

Your PC will then restart and it should now not turn on when the phone rings.
